

# Between Crisis and Mobile Phone Prayer and Care

**Prof. Dr Cui Wantian**

**Entrepreneur, President/Founder of Geneva Agape  
Foundation, Beijing, China**

# Spirituality 4.0 at the workplace

## **Work is worship**

### Lighting business with Agape/love

Prof. Moses Cui Wantian

Founder & President of Geneva Agape Foundation;  
Director, Bring Spring Science and Technology Co., Ltd

# Spirituality 4.0 at the workplace

## Work is worship

- Spirituality 4.0 from AI to AI:  
from Artificial Intelligence to Agape Intelligence
- AI Artificial Intelligence means:  
humans become God (We abuse God)
- AI Agape Intelligence means:  
God becomes human. God comes to us. (Emmanuel: God with us)
- Spirituality means: we do not ask God to serve us and what he does for us, but we ask what we can do for God and how to come closer to him.

# Spirituality 4.0 at the workplace

## **Work is worship**

- “The Gospel Company”: my story

How to worship in business in daily life

- Tough business year: 40 days of death and resurrection
- Daily mobile phone spiritual reflection and prayer (365)
- Secretary of the Party Committee of Bringspring and Christian: double “spiritual leader” 思想精神领袖. E.g. Dinner blessing
- Every month a reading/reflection workshop with company management team.

# Spirituality 4.0 at the workplace

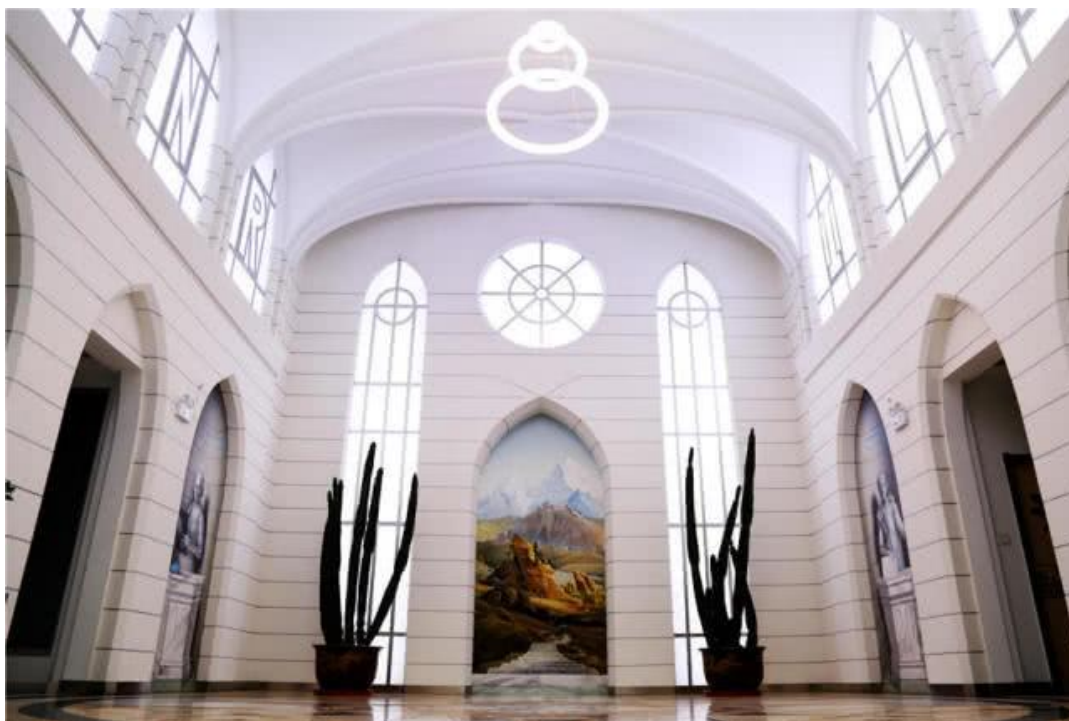

## **Work is worship**

- Spirituality needs daily practice like the body needs daily food
- We have to practice spirituality in fellowship/community
- Spiritual environment in Company Architecture
- Agape/Love in action:
  - Geneva Agape Foundation: values driven entrepreneurship
  - Liaoning Agape Foundation: caring for young poor children
  - Kingdom Business College: Christian business education

# Current business model facing enormous challenges

---

- Imbalanced social relationship: the disparity between the rich-poor gap continues to widen, the rise of global inequality.
  - Deteriorated ecological relationship: the ecological system is deteriorating and extreme weather hit us more frequently.
  - Worsening cognitive dissonance: low sense of happiness and distorted values.
- 

# Reason

- The two pillars of modern civilization--science and market--have served human progress, but today they are more often used as a means of achieving private ends.
- While emphasizing the control of people and things, science and technology turn the natural and living world and people into tools.
- The market attributes the value of people and things to the value of money, thus making wealth a symbol of success for people and society.

## Root cause: insufficient of positive externality

- An **externality** is the cost or benefit that affects a party who did not choose to incur that cost or benefit .
- A positive (negative) externality is the positive (negative) effect an activity imposes on an unrelated third party .
- The root cause of the crisis in today's business model is the excessive supply of negative externalities and insufficient supply of external externalities, but in the end is the problem of people.

## What is Agape+ Economics?

Traditional  
Economics

Agape: positive  
externality

- *Economic man* , to maximize utility as a consumer and profit as a producer
- True love is an act in which individuals continue to produce positive externalities to others. This is manifested in a positive relationship between individuals and others and the world.

Agape+ Economics

maximizing positive  
externality

# The Correction of imbalanced relationships

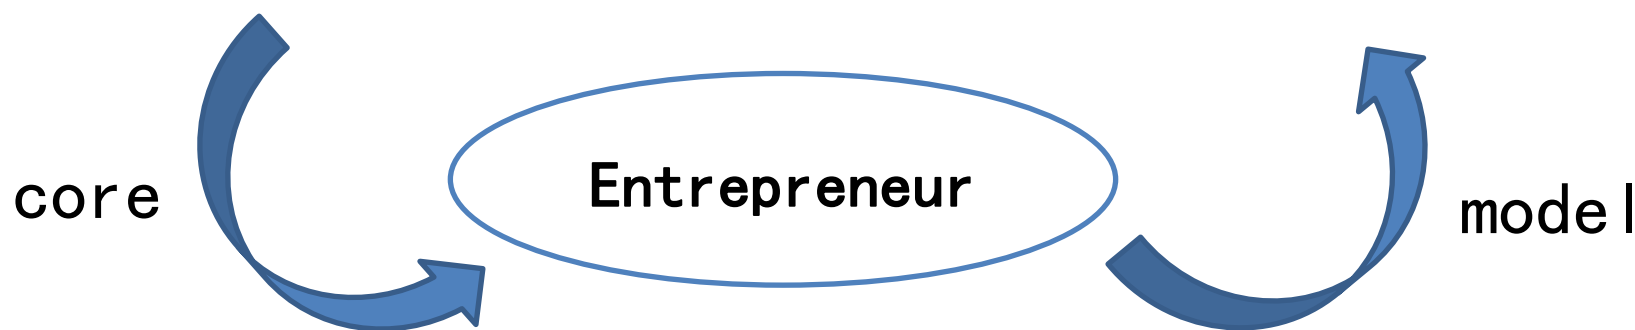

- The goal of social development is to maximize social welfare, rather than to maximize efficiency.
- The development model must not only meet the needs of the present, but also consider sustainability.
- Individuals pursue not only wealth but also life value and happiness.

*Agape* + Economics

*Agape* + Business

## *Agape* + Business model: Macro level

- **Agape + Finance:** NGOs with love as financial supervision third parties can enhance the positive externalities of finance.
- **Agape + Investment:** Taking risks is the enterprise's responsibility to society.
- **Agape + Enterprises:** A company that aims to provide positive externalities is a good and valuable company.
- **Agape + Innovation:** Innovation can only happen in a free environment, which is empowered by the people and government.

## *Agape* + Business model: Micro level

- **Agape + Consumption:** Consumers vote for the future of humanity.
- **Agape + Tourism:** Let religion return to the essence of public goods to better provide positive externality.
- **Agape + Health care :** Profit is the killer of public health, and love is the essence of public health care.
- **Agape + Education:** Life is not a tournament, and the healthy growth of children is the original intention of education.

## Establish a security mechanism

---

- To establish a system to guarantee freedom, only the authority with love would give people freedom. The basic experience of China's reform success is nothing more than expanding the freedom of people's choice.
  - Only those with love can pass on love to others.
  - Creativity depends on freedom: freedom of thought and freedom of action. Freedom is an indivisible whole. Innovation can only happen in a free environment.
-

## Establish a security mechanism

---

- Faith: Guide the direction in which people deal with relationships and prevent self-centered efforts.
  - Promoting the construction of social organizations with love.
  - Promote entrepreneurship with love.
  - People returning from “social people” to “natural people”.
- 

## Work is worship

«Each of you should use whatever gift you have received to serve others , as faithful stewards of GODs grace in its varius forms.»

1Peter 4:10

Thank you so much
