

Workgroup [Impact Investment]

1. A Western definition (Rockefeller Foundation)

Deployment of capital for receiving financial and moral return. Moral return being the return expected from values (vision and mission) in context.

2. Context for Faith-Based Entrepreneurs

- Trillions are managed by Faith-Based Organisations (FBO)
- FBO are by far the largest global/local impact organisations
- FBO have all the capacity to scale-up impact investment
- Consistency («*practice what you preach*») is now at stake.

3. Questions to be addressed (next steps):

- *Recognizing the context and agreeing on a plan of action?*
- *Supporting collaboration between entrepreneurs and investors?*
- *Getting stronger, together in the Market Place?*
