

We are Business Coalition of Faith Driven Entrepreneurs working in Uzbekistan.

Our vision is to build a working model of Ecosystem in Uzbekistan; we want to implement it further to other countries of Central Asia.

Shortly about us:

It was 2017, when a group of Christian Entrepreneurs from different churches decided to launch business club to make Christians more professional in business, start ups, and other the most important reasons to show Christians and our youth that they can work and grow professionally in their homeland. We also reached non-Christian entrepreneurs through it. We named it as BC "UCreate". We have grown actively by God's grace raising up own members in Tashkent and developing regions too.

Presently we have achieved the following results:

We have been transformed into "Business Coalition of Faith Driven Entrepreneurs" from the beginning of 2020. We united three business communities UCreate, Impulse and Calv Group with around 40 entrepreneurs from more than 10 churches.

We organized in our city, several business events for Entrepreneurs such as BAM trainings with the participation of IBEX, many other business trainings in regions, Business Chapters and online trainings during COVID with the support of Angello Group and GAF with the participation of Professor Christoph Stueckelberger.

We do not have here any Christian Investment Funds or business organizations in our land. We clearly understand that we cannot do our vision by ourselves because of lack of knowledge and experience.

WE NEED LOANS & INVESTMENT TO SURVIVE COVID

We need strong Partners, mentors, investments, grants, trainings to launch incubators, accelerators for the building of Ecosystem in our Land.

- 60% of our business can be closed because COVID
- We don't have support, taking them from banks are very difficult
- Our network has around 40 different business, which need support
- Approximate amount of support is different from 5 000\$-20 000\$ depending on the scale of the business.

WE NEED SUPPORT TO BUILD THE BUSINESS ECOSYSTEM IN OUR LAND

- Training of trainers and mentors
- Starting Business Incubators and accelerators
- Grants needed to build the ecosystem
- Expansion of own businesses and starting new businesses
- Low interest loans and early stage investment needed

Besides, business activities we also do Social Projects as:

“Food Project” for this winter season 2020-2021

We do it together in one Spirit with Baptist Brotherhood, Presbyterian Churches Union, Christian of Full Gospel and many others.

Shortly about this project:

We have bought for one family by each packet consisting on mostly from:

Rice, flour, buckwheat, macaroni, eggs, mash, sugar, food oil (sun oil, cotton seed oil).

These products are very demanded in families, which are poor and using them, they can cook food for themselves within long period.

The approximate number of families we have already covered is around 1000 mostly in regions and Tashkent areas, where people don't have any money at all. The food products will be given them twice. We also cover around 20 pastors' families who serve in regions and do not have enough money for food.

We give food products to the same people, families minimum twice: the first one is before the Christmas so that we have a reason to say to non-believers about Jesus and share Gospel with them. Second time is in the middle of winter during the coldest time.

We will involve our sisters for packing the food packets and brothers for delivering via driving to the places where needed people and families live. The driving will take a lot of time, because of distance and different places including regions and Tashkent areas.

The finances for this project was gathered by: Participants from our Social Support team and our Churches, which have donated money, several friends from overseas who supported mainly with the donation and special thanks to GAF Foundation for their donation.

We want to start the second stage of this project is to buy coal and wooden briquettes for the families in regions of our Republic. This winter is very tough and cold, people living in regions have very poor gas or do not have at all there and electricity to make their homes warm.

If you have any desire to support in Social or Business Projects or need other information, please contact:
